RE: Revisions to the Slidell Senior Citizen Driveway at 610 Cousin St, Slidell LA

To Whom It May Concern:

Dammon Engineering is pleased to propose our design services for the design of renovations at the Slidell Senior Citizens facility.

We propose to furnish a design package to correct safety issues for seniors exiting the facility, crossing the driveway to enter the parking lot.

We propose a total fee of \$2,200.00 (Two Thousand Two hundred dollars). This fee includes the design and submitting the plan(s) to the City of Slidell. It also includes managing the project for COAST.

Please note that our fee does not include the cost of permitting, any parish or other government required studies or tests, nor the cost of traffic, or other engineering studies, which may or may not be required.

We appreciate the opportunity to propose our services and we look forward to working with you on this project. If you have any questions, or require any further information, please feel free to call.

Sincerely,

David Dammon, VP
Dammon Engineering, Inc.
