RE: Wilkinson Row Heat Load Calculations

Dear Mr. Walker,

Dammon engineering proposes to provide our services to calculate the heat loads at your Wilkinson Row Project, as described to us in your email and drawings received on Nov 10th. The calculated loads will be preliminary, but beneficial and necessary to you for estimating the A/C load and cost, and to Dammon Engineering when accomplishing the final design of the mechanical systems.

Our proposed fee for this work is based on 8 manhours work at \$125.00 / hr, with the fee not to exceed fee of \$1000.00.

We ask that you provide us with answers to the following:

1. Plans that show the dimensions of all of the main building parameters.(Condo sizes)
2. R value of roof
3. R value of walls
4. Characteristics of the glass
5. Direction of North
6. Will all condos be separate DX units?

If you need to estimate this information, let us know that it is an estimate.

Dammon Engineering carries \$1,000,000 Professional/General Liability Insurance, Auto Insurance and Workmen's Compensation Insurance.

We look forward to working with you on this project. Please indicate your acceptance of the above by signing below. If you have any questions, or require any further information, please feel free to call.

Sincerely,

Emmett (Pete) Dammon, P.E.
