RE: Stone Road Building Mezzanine Addition

Mr. Ledet,

Thank you for the opportunity to propose our services for the referenced project. Dammon Engineering is pleased to provide you with our proposal to furnish architect and engineering services for the above-proposed project on Stone Road, which will consist of the addition of approximately 3,690 square feet for office space inside the existing warehouse.

Our design package will include project specifications and drawings, ready for bidding, provided to you following 100% design completion as well as as-built drawings for demo plan of all associated work to be removed.

Prior to construction several electrical, sprinkler, domestic water, compressed air, natural gas, fiber optic, sanitary sewer and computer network pipes as well as an electrical bus duct must be relocated/rerouted. The costs of these renovations are included in the Total Estimated Construction Cost.

We propose a fee of approximately 7% of total Construction Cost. Based on a Total Estimated Construction Cost of \$562,800.00 our fee would be \$39,396.00 (Thirty Nine Thousand Three Hundred Ninety Six Dollars). This fee includes city and state reviews. The above fee does not include the cost of soils analysis, drainage studies, traffic studies, wetlands determination, or other engineering studies that may be required by government agencies.

Dammon Engineering, Inc. will be available during the construction phase to answer questions and clarify information contained in our plans.

If you have any questions, or require additional information, please feel free to call.

Sincerely,

David Dammon, VP  
Dammon Engineering, Inc.
