Policy Number: 01254356901

Re: FOREMOST INSURANCE Audit DAMMON ENGINEERING, INC.

Foremost Insurance Group has contracted with US Insurance Audit Services, Inc. to perform a premium audit of your business by internet, fax or mail this year. Now that your company's **Workers' Compensation** policy year has ended, it is time to perform a premium audit to determine the actual exposures. As you may recall, your deposit premium was based on an ESTIMATE. The provisions of your policy require a review of your business records to determine the ACTUAL exposure for the period of 07/18/2017 to 07/18/2018. Your professional Insurance Agent is available to answer your questions regarding your policy coverage(s) for this audit.

We would like to perform your premium audit via our secure website this year. The process should take the same time as filling out the forms by hand as you may have done in the past and providing the information online also reduces the risk of error. If we have any additional questions about your business after we receive your information, we will call you shortly thereafter.

To provide your premium audit information online, please visit the following website and log in with the information provided here:

Address: <https://www.webaud.com/usi/>
Control Number: 641348
Password: pineapple574838 {Case Sensitive}

PLEASE COMPLETE THE WEB FORMS AND SUBMIT YOUR DATA BY 08/01/2018

If you have any questions, please call the auditor assigned to your account at the telephone number shown below. If you do not have Internet access and cannot provide your information online, please call to request that manual forms be sent to you. If you leave a message for the auditor, be sure to leave the "Control Number" as shown in the upper right of this letter. You may also find the answers to some commonly asked audit questions on our website at: <http://usinsuranceaudit.com/audit-faq/>.

Thank you for your assistance.
