- TWO YEAR ANY PART REPLACEMENT WARRANTY
- ETL LISTED AND CERTIFIED (USA, CAN)

G303A MAIN FEATURES

- Our G303A Walk in **tub shell** is made from high quality cast acrylic sheet, has white gloss finish, it is easy to clean and it is scratch resistant compare to lower quality fiberglass gel coat Walk in tub shells offered by our competitors. Not many Companies can produce acrylic walk in tubs because only perfect technology and experience allows production of a deep cast acrylic tub shell without cracks and defects. We have accomplished that.
- Stainless steel rust proof **frame** for the tub can be easy leveled with 6 adjustable feet for easy installation.
- The unique design of the **door frame and the seal** allows easy door seal replacement. The replacement of the seal takes 5 to 10 minutes (if ever needed) if silicone is not used and cleaning is not required.
- The unique design & look **stainless steel, tempered glass door** is strong and reliable with rounded bottom for easy foot access and closing the door.
- Easy access step in **low threshold** door step. The design of the tub and the tub frame allows to decrease existing 8 ½" height of the threshold to as low as 4" with customized installation if desired.
- Slip resistant, **textured floor** design for safe entrance or exit.
- **Safety held bar** handle for additional safety.
- **Thermostatic control valve** allows user to set desired water temperature prior using the bath. The safety stopper on the handle of the thermostatic valve is set for 104 Fahrenheit protecting the user from the accidental skin burn due to hot water.
- Extra wide 23 1/8" and 16 ½" extra high **seat** allows easy standing up after the bath, comfortable relaxed knee position with plenty leg room in the front for a bigger person and easy to reach controls for any size person.
- The height of 16 ½" from the top of the seat to the top of the tub allows average size person to lean back cover upper body in the water and enjoy the soaking.
- Therapeutic **air massage** with 7 air jets for lesser penetrating therapeutic pleasant air bubble massage.
- **Hydrotherapy massage** with 8 hydro jets and adjustable flow rate intensity control switch.
- **Ozone sterilization** for killing bacteria, viruses, microbes, germs, deodorizing and keeping your massage system cleaner and water disinfected. This is the most efficient and eco friendly way to sanitize your bathtub.
- 100% Brass, chrome finish **spout** and pull out adjustable **hand held shower mixer**.
- Three quarter ¾" inch stainless steel braided pressure **water supply lines** for faster water filling
- 1.5W inline **water heater** to maintain the warm water temperature during the bathing
- There are 2 front and one side **removable access panels** for easy part access and service. Removable **side panel** is great option to save the money for construction of the sidewall. The panel covers one side of the tub and can be used as additional access panel if needed. **All parts** are located for easy access and service through front access panels.

WALK IN BATH TUB G303A
