

David,

I don't quite understand this information.

This period is the 07/17 - 07/18 payroll period.

The amount they show under total salaries covered is:

197,185.00
54,353.00
<hr/>
251,538.00

Which would roughly represent all of the salaries during that period, PLUS the \$50K in bonuses to you and Chuck.

While this particular audit doesn't show an increase in premium (it shows you're due \$46.00 to be returned to you), from my point of view, it does not look like they excluded you or Chuck. Maybe they couldn't do it retroactively?

Did you decide not to have coverage for the 2018-2019 period?

Thanks,
Cindy
