Re: Parish Landfill
Pre-Treated Leachate Force main and Gravity Sewer
Puleston Road Sewage Collection Line & Force Main
City of Amite
Tangipahoa Parish

Attention Reviewer:

Attached for your review and approval is a collection line and force main (FM) pumping station along Puleston Road. The force main (2") shall connect with a larger force main (6") and shall terminate at the Amite Municipal Wastewater Treatment Facility. The Puleston road collection line is part of a larger wastewater project to move pre-treated landfill leachate and sewage to the Amite Wastewater Treatment Facility.

The domestic portion of the project, for your review, consists of 8" and 12" PVC collection line and a pump station to service +/- 128 residents along Puleston Road.

Should you have any questions or if further information is required, please do not hesitate to contact me, Brian A Mistich or David Dammon at Dammon Engineering, (985)-649-5832. We await your reply.

Respectfully,

Brian A. Mistich, P.E.
