RE: Stone Road Building Addition

Mr. Uhle,

Thank you for the opportunity to propose our services for the referenced project. Dammon Engineering is pleased to provide you with our proposal to furnish architect and engineering services for the above-proposed project on Stone Road, which will consist of the addition of an approximately 2,790 s.f. building to the existing facility.

As per your instruction, the dimensions of the addition will be approximately 15' x 186' and it will include a tool room, maintenance shop, café and restrooms.

Our design package will include project specifications and drawings, ready for bidding, provided to you following 100% design completion as well as as-built drawings for demo plan of all associated work to be removed.

We propose a fee of approximately 7% of Construction Cost. Based on an Estimated Construction Cost of \$418,500.00, our fee would be \$29,295.00 (Twenty Nine Thousand Two Hundred Ninety Five Dollars). This fee includes city and state reviews. The above fee does not include the cost of soils analysis, drainage studies, traffic studies, wetlands determination, or other engineering studies that may be required by government agencies.

Dammon Engineering, Inc. will be available during the construction phase to answer questions and clarify information contained in our plans.

Dammon Engineering carries \$1,000,000 Professional/General Liability Insurance and Workmen's Compensation Insurance.

If you have any questions, or require additional information, please feel free to call.

Sincerely,

Chuck Dammon, VP
Dammon Engineering, Inc.
