 Project: Fox Lair Subdivision

Regarding: Quote for a 7,500 GPD Sewer Treatment Plant

Description: Gainey's Extended Aeration 7,500 GPD Sewer Treatment Plant

This plant will treat non-industrial sewerage influent with a BOD concentration of 250mg/l over 24 hours to provide an effluent quality of 30mg/l of BOD 5 day and 30mg/l TSS. The chlorine contact chamber will provide adequate disinfection. (<400ppm fecal) through a hypochlorite concentration of 8mg/l to meet LA DEQ standards including a minimum retention of 30 minutes at DAF and 15 minutes at PDF.

Should you require lower effluent limits or de-chlorination or monitoring equipment we would be happy to quote you on additional equipment.

Design summary packages, specifications, and CAD drawings are available upon request. This plant's site plan and design submittal must be reviewed, stamped and signed by a registered professional engineer. The cost of this is the responsibility of you the customer. We would be happy to discuss this project with your engineer and provide information as required.

Sewer Plant to Include:

Aeration Capacity:	7,500 Gallons	Chlorine Contact Chamber:	500 Gallons
Clarifier Capacity:	1536 Gallons	Chlorinator Model:	Jet Model 110 Chlorinator
Surface Area of Clarifier:	37.5 Square Feet		

System Installation Includes:

Blower Model:	KPHRB402/1 Regenerative Blower Package
Motor:	3HP, Single Phase, 230V
Control Panel:	Duplex Control Panel

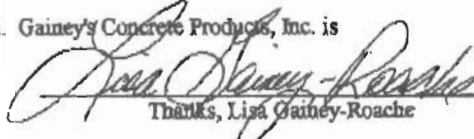

*Plumbing will be provided for a stub-out at each end of the system for your plumbing contractor to tie into. A 230 volt single phase power supply will need to be provided by your electrical contractor.

Price: \$22,491.00

Notes:

Please note that this quote will be valid for 14 days.

All work is performed conforming to OSHA's regulations for safety in excavation. Gainey's Concrete Products, Inc. is licenced and insured. All documentation is available upon request.

 Thanks, Lisa Gainey-Roache
