McKinney Products Company designs and manufactures high quality architectural hinges for commercial use. With roots in Cincinnati OH, McKinney moved to and manufactured in the heart of the Pennsylvania steel industry for many years.

McKinney became an ASSA ABLOY Group brand in 1996. With the resources of ASSA ABLOY, McKinney greatly expanded its research and development, and manufacturing capabilities. These expanded capabilities have had the greatest impact on improving custom hinge manufacturing.

A variety of materials and hinge types can be custom manufactured in our Berlin, CT plant, including the ElectroLynx® hinges and Power over Ethernet (PoE) hinges. For more information on custom manufactured hinges, call McKinney at 1-800-346-7707.

### Innovation

To support today's need for electronic security applications, McKinney has developed a variety of electric hinges used in remote door monitoring and access control systems, and received a patent on the Power over Ethernet (PoE) hinge. In addition McKinney has teamed up with other ASSA ABLOY Group brands to offer StormPro tornado resistant solutions.

### Decorative Hinges

McKinney offers decorative architectural hinges with special tips and finishes. Designed to suite with hardware from ASSA ABLOY Group brands, these commercial decorative hinges open up a whole new world of design options for your door openings.

### LEED Certification

McKinney can help to achieve prerequisites and accumulate points in several categories and credit areas of LEED. For further information, please call 1-800-346-7707 or refer to our website [www.McKinneyhinge.com](http://www.McKinneyhinge.com).

### Recommended Number of Hinges Per 3'0" Wide Door\*, Either Wood or Metal

Door Height In. (mm)	Number of Hinges per Door
Up to 60" (1524)	2
60" to 90" (1524 to 2286)	3
90" to 120" (2286 to 3048)	4

\* Consult factory for doors wider than 3'0". Doors up to 60" in height shall be provided with two hinges and an additional hinge for each additional 30" of door height or fraction thereof. The distance between hinges shall be permitted to exceed 30". Where spring hinges are used, a minimum of two must be provided.

### Standards

- Template hinges are made in sizes, gauges, and with screw holes located to conform to ANSI/ BHMA A156.7 and U.S. Government standards CS9-65 and SDI. Templates are available on McKinney's Website at [www.McKinneyhinge.com](http://www.McKinneyhinge.com), or upon request
- McKinney finishes meet or exceed ANSI/BHMA A156.1, A156.18 and BHMA 1301 standards for materials and finishes
- McKinney bearing hinges meet or exceed the testing requirements of NFPA-80 Table 6.4.3.1 2010 Builders Hardware
- McKinney spring hinges meet or exceed testing requirements of ANSI/BHMA A156.17 and are UL listed in both the USA and Canada
- McKinney continuous hinges meet or exceed testing requirements of ANSI/BHMA A156.26 and are UL listed in both the USA and Canada

\* Heavy weight hinges should be used on all heavy weight doors or those exposed to high frequency use. Five knuckle heavy weight hinges have four bearings. The following gauges of metal apply:  
Heavy weight 4 1/2" (114) high = .180 gauge  
Heavy weight 5" (127) high = .190 gauge  
Heavy weight 6" (152) high = .203 gauge

NOTE: Five knuckle 8" (203) high hinges have six bearings.

NOTE: Weights do not include hardware. Metal and wood door weights are approximate and will vary slightly among door manufacturers.

## Full Mortise Hinges

### MODERNE Two Knuckle Full Mortise

Offers the most security in a standard hinge. The bearing hinges have a stainless steel pin and anti-friction bushing in the door leaf, which provides additional protection against vertical and lateral wear.

- Plain bearing hinges have an anti-friction component inserted between the two barrels
- The slim barrel Moderne two knuckle hinge is available in steel and non-ferrous base
- Standard and heavy weight
- Pins in all bearing hinges are stainless steel
- Pins in plain bearing hinges are steel; stainless steel pins are available
- Decorative tips available
- Standard hinges are packed with all machine by all wood screws
- By design, pins are non-rising, non-removable and tamper protected by a flush, non-removable cap at the end of the barrel. A door can not be removed when in the closed position, thus affording maximum security. Intermediate hinges can be ordered opposite hand and installed upside down, to inhibit removal of the door in an open position
- Available non-removable door (NRD) hinges have a set screw in the barrel of one hinge in the set of 3
- Two knuckle hinges are handed

### Slip-In Hinge: Type 1 and Type 2

Type 1

Type 2

Recommended for use on average frequency and/or medium weight aluminum doors with aluminum frames in schools, hospitals and other public buildings where medium traffic is experienced.

#### Type 1

- One leaf has standard punching and countersinking and the other leaf is drilled and tapped so it can be inserted through a slot in the door or frame
- Both leaves are specially swaged to provide 3/16" clearance between leaves when parallel
- Hinges are handed - Indicate hand when ordering
- Packed with wood and machine screws

#### Type 2

- Both leaves are drilled and tapped so they can be inserted through a slot in the door and frame
- Both leaves are specially swaged to provide 5/16" clearance between the leaves when parallel
- Hinges are non-handed
- Packed with all machine screws

## Security Hinges

### Full Mortise Institutional

Full mortise institutional hinges (prefix HTB) are designed especially for maximum security installations including hospitals, high security schools, institutions, and prisons. Institutional hinges are available in either steel or stainless steel. Available with Torx pin head security machine screws (suffix TXS).

- One piece non-removable pin is held intact by the insertion of two sets of dowels held in double shear into an internally constructed shelf
- Knuckles with tapered hospital tips prevent tampering and removal of pins
- To further enhance its security, this hinge is available with an optional prison safety feature (suffix PSF)
- Single studs projecting from the back of each leaf fit into the hinge reinforcement on jamb and door to prevent shearing of screws
- Consult the factory for additional information regarding our security hinge line which includes additional sizes and electrification of hinge (magnetic monitoring not available with PSF security stud)
- Additional finishes are available in steel
- Ball bearings are supplied as a standard on institutional hinges

### Full Mortise Anchor

Horizontal Frame Leg

Anchor hinges are used in abusive areas in which the door, jamb, and hinges experience unusual strain. All anchor sets consist of the top anchor and two 5" x 4½" (127 x 114) three knuckle full mortise heavy weight hinges. Anchor sets are handed.

- NRP furnished on set as standard. (Set consists of one anchor and two heavy weight full mortise three knuckle hinges)
- Anchor hinges are handed
- Can be swaged for either square edge or beveled (hinge side) edge

CSS-9  
Offset Hung

CSS-9  
Center Hung

Recommended for installations on hospital or nursing home bathroom doors along with McKinney EP5-J. This unit allows center hung or 1/8" inset doors to be opened in both directions without damaging the frame.

- .095 gauge brass material polished and plated
- Manufactured for use with cylindrical or bored locks
- Packed with 1/2 x 8-32 machine screws
- Consult the factory for use with Mortise locks by ASSA ABLOY brands. Cannot be used with deadbolts

### Emergency Door Stop: DS-6

DS-6

For use with McKinney EP5-J pivots in schools, hospitals, institutions, and other public buildings. Used for converting double acting doors, hung on center pivots, to single acting doors.

- Furnished in brass material with rubber bumper insert
- Spring action stop with fingertip release using a pullman-type latch
- Highly polished, then naturally finished or finely plated
- Mortise only on frame

DS-6	4 1/2" x 1 5/8" (114 x 41)	1/2" x 12-24

### Double Lipped Strike: DLS-8

DLS-8

Recommended for installations on hospital or nursing home doors along with the EP5-J and DS-6. This unit allows center hung or 1/8" inset doors to be opened in both directions without damaging the frame.

- Made from .095 gauge brass
- Polished and plated
- Available in center hung or offset
- For frame size 5 3/4" (146) and 6 3/4" (171)
- Supplied with six each 1/2" x 8" machine screws
- Other sizes available upon request

## Spring Hinges

### Full Mortise Single Acting

Grade 1, surpassing a million cycles

For use on wood or metal doors in apartments, hotels, motels, offices, and other public buildings. Two concealed tee bearings for vertical and lateral loads. Coil spring design provides dependable closing power.

- The 1500 Series has infinite adjustment, and tension can be added or reduced
- Locking screw prevents tampering after tension is set
- NFPA 80 requires a minimum of two spring hinges on labeled doors
- 1502 Now available in reverse action, specify 1502R
- Consult the factory for the TRS security option

### Full Mortise Double Acting

Double acting hinge is designed to be applied directly to the jamb without the use of a hanging strip. Door flange requires a shallow mortise. Springs are made of high grade tempered steel.

- 3" (76), 4" (102), 5" (127) and 6" (152) hinges are for wood doors not weighted with plate glass or heavy hardware
- Hinge capacity decreases as door height increases
- For stock hollow metal doors, use 6" x 4 1/2" (152 x 114)
- 8" (203) 9001 is designed for use on wood or heavy doors of metal construction
- 8" (203) 19001 is designed for use on trucking doorways

## Spring Butt

These heavy duty hinges are made from heavy cast iron with two axis which permit opening the door 90° in each direction. They are designed for use on high frequency and heavy wood or metal trucking doorways in post offices, warehouses, and other buildings where heavy traffic is experienced.

- These hinges are particularly useful in preventing door oscillations in extreme and variable draft conditions
- Available in prime or powder coat finish

## Spring

450 Series Heavy Duty

These springs are the most economical and simplified method for closing doors. The coil springs are made of high grade steel wire, and tension is adjustable.

- No special tool is required to apply tension
- Springs and screws are furnished in black (D4) finish

## Aluminum Continuous Geared Hinges

McKinney provides aluminum continuous geared hinges for application on wood, aluminum, and hollow metal doors and frames. Mortising is not necessary as all leaves fit on the edge or the face of the door.

The continuous geared hinge has no pin; instead it uses two geared sections with a continuous cap concealing the gears and the wear surfaces. This design minimizes lateral wear and virtually eliminates door sag. The gear design keeps each leaf in perfect alignment for the full length of the hinge, causing the door to swing evenly from top to bottom.

SER Option Shown

LISTED Door Hinges 76Y2

- McKinney continuous hinges come in either clear satin or bronze anodized finishes and are available in lengths from 79" (2007mm) to 120" (3048mm) for standard or heavy weight applications
- Full mortise, full surface, and half surface types available
- McKinney aluminum continuous geared hinges are certified as fully functional after 1.5 million cycles using a standard duty hinge on a 150 lb. door
- McKinney aluminum continuous hinges have been tested and certified by Underwriters Laboratories, Inc.® (U.S.A. and Canada) for up to a 3 hour (A Label)
- Fire Listing for all 4'0" x 10'0" (1219mm x 3048mm) and 8'0" x 10'0" (2438mm x 3048mm) door and frame assemblies. McKinney continuous hinges are guaranteed for the life of the opening. Electrical options are guaranteed for five years.

Fire listing certification applies to all approved hollow metal and wood door assemblies in dry wall or masonry wall construction

- Fire Pins, which also increase the security of the door, are required for 3 hour applications

### McKinney Continuous Geared Hinges can be electrically modified in three ways:

- SER- Serviceable/Removable hinges are provided in three sections allowing the current carrying cable to be serviced or replaced without removing the door from the frame
- ACC- Accessible feature is provided in a single section with leaves modified to pivot at the location of the current carrying cable to allow access to the cables and connected wiring
- QC- Quick Connect hinges are provided in a single section with the wires already run through the hinge

## Steel and Stainless Steel Continuous Hinges

McKinney steel and stainless continuous hinges are the clear choice for institutional, industrial or any other high frequency applications where maximum door support is required. Consistent high quality manufacturing and performance levels make door aligning easy for maintenance free, long lasting results.

- Non-handed hinges with slim barrel design, concealed Teflon-coated stainless steel, free-moving rod
- Split bearing assembly improves cycle life and promotes quiet and smooth operation
- McKinney type 304 stainless continuous hinges are provided in satin stainless (US32D) finish and are available in bright stainless (US32) on a custom ordered basis
- Steel hinges are gray powder coat finish
- McKinney steel and stainless steel continuous hinges are UL listed (USA and Canada) for up to and including 3 hours
- These hinges support up to a 600 lb. door (FM3500 will support a 900 lb. door)
- Guaranteed to be free from defects in materials and workmanship for a period of ten years
- Maximum labeled opening: 8'0" x 8'0" pairs of doors
- Consult the factory or the McKinney catalog for additional information
- Full complement of electrical options are available
- Many models are windstorm rated

## Full Mortise Electric Hinges

### ElectroLynx® Hinge (QC option)

QC-12

Features concealed plug connectors that eliminate the need for separate or exposed wiring. Standard connectors make installation quick and simple. Brass eyelets add protection and durability.

- The QC option is available on standard and heavy weight full mortise bearing hinges as well as swing clear and wide throw hinges
- Electric hinges allow a constant flow of energy from the power source through the hinge to electrified door hardware. No external wires can be seen, eliminating tampering and improving the aesthetics of the door opening
- Materials: brass, stainless steel, and steel
- For 4 amp continuous @ 24 volts AC or DC per circuit, 28 gauge multi-strand wires are used. A pigtail is provided for connection to the source wiring
- An 8 position connector is used for QC2, QC4, QC6 and QC8 wire hinges. An 8 position and a 4 position

connector is used for QC12 wire hinges. A QC2A wire hinge is available for power on, power off applications

- Hand of hinge must be specified on two knuckle hinges
- Full Mortise QC hinges are available in most BHMA and McKinney powder coat finishes
- Wires are coordinated to work with other ASSA ABLOY Group brands electro-mechanical hardware
- Electric hinges should be installed in the center position on the door. Installation instructions are packed with each hinge
- Hinges are factory tested and specially packaged to minimize against damage during shipment

### ElectroLynx® Power over Ethernet Hinges

Patent No. 7,824,200

The patented McKinney ElectroLynx® Power over Ethernet (PoE) Quick Connect hinge provides for the passing of Ethernet data through the door opening. Installation is a snap with the friendly "plug and play" connectors which allow power to be linked from the incoming source through the door to the electrified hardware. PoE data is bidirectional.

- Brass eyelets add protection and durability to the PoE hinge which features common wire colors coordinated to work with intelligent Power over Ethernet electromechanical hardware from SARGENT and Corbin Russwin
- The PoE hinge should be installed in the second from bottom hinge position on the door. Once installed, it will give no outward indication of its function and will transfer power and data efficiently and reliably, as long as the wire capacity is not exceeded
- All PoE hinges are factory tested and specially packaged to minimize damage during shipment. Installation instructions are packed with each hinge.
- Along with the PoE hinge, mating PoE door and frame side harnesses are required to complete the opening. The required PoE harnesses must be ordered separately
- See full line catalog for PoE harness part numbers.
- Specify suffix PoE

\* Refer to individual full line catalog pages regarding the availability of these options.

## Full Mortise Electric Hinges

### Concealed Circuit

McKinney Concealed Circuit (CC) electric hinges allow a constant flow of energy from the power source through the hinge to electrified door hardware. No external wires can be seen, eliminating disruption of power due to tampering or disconnection, and improving the aesthetics of the opening.

- Allows operation of devices requiring power such as electric locks, electric strikes, and electric latch retraction exit devices
- Wires are contained within the hinge — invisible and tamperproof
- Available with most two, three, and five knuckle bearing hinges
- Available with 2, 4, 6, 8, 10 or 12 wire
- Materials: standard and heavy weight, brass, steel, and stainless steel
- Four amp continuous @ 24 volts AC or DC per circuit  
16.0 Amps intermittent duty (pulse) for 300 milliseconds
- Can be used in conjunction with MM option on most full mortise hinges
- Optional Mortar guard MG-16 available
- Hinges are supplied with 8" (305) leads as standard
- Extra lengths are available at additional cost
- Two knuckle style is handed

### Magnetic Monitoring Hinge

The McKinney Magnetic Monitoring (MM) Hinge is the only system on the market that permits field replacement of magnet and switch. It is a simple, dependable system which defies detection, yet is readily accessible for inspection and easy adjustment.

- MM Electric Hinges should be installed in the center position on doors with three hinges or the second hinge position from the bottom on doors with four hinges
- Neither switch nor operating magnet are attached to the hinge. Non-attachment feature reduces the chance of damage during installation. Installation instructions packed with each hinge. All MM Electric Hinges are individually factory pre-tested
- The MM feature is available on most two, three and five knuckle full mortise standard and heavy weight hinges, and our full mortise aluminum continuous hinges. Consult the individual catalog pages for this option feature
- For low voltage (48 volt maximum) .25 Amps AC or DC non-inductive load
- Magnetic reed concealed switch impervious to dirt and moisture
- Narrow Stile (NS) Switch and Wide Gap Magnet options available
- Can be used in conjunction with QC option on most full mortise hinges up to QC12
- Can be used in conjunction with CC option on most full mortise hinges up to CC12 Wire
