

Small and Emerging Business Development Program

Date: 5/4/2018

Certification ID: 9814

Dammon Engineering, Inc.
554 Old Spanish Trail
Slidell , LA , 70458

Congratulations! Your application with LED's Small and Emerging Business Development (SEBD) Program has been reviewed and approved. You are hereby issued certification 9814 as evidence of such certification. When funding permits, this certification entitles your business to participate in programs targeted to assist in the growth and development of your business.

This certification is valid for a period of ten (10) years, or at such time that your firm has outgrown the criteria established by law, or your company does not make satisfactory progress in its growth and development. To remain in "Good Standing" in the program, you must notify LED of any changes in ownership, control or operations which might affect the eligibility of your company to participate in the SEBD program.

Now that your business is certified in the SEBD Program, the next step is for you to contact the SEBD Intermediary nearest you to discuss what assistance is required to help you succeed in growing your business. You will need to provide them with a personal financial statement, a business financial statement, and a copy of your business license (if applicable). **A list of all the SEBD Intermediaries** can be found on the LEDSmallBiz website and we encourage you to contact an intermediary at your earliest convenience.
