 Terms & Conditions

A Network Assessment is required before the final proposal can be submitted. This process will evaluate your current infrastructure and identify any changes that are needed to assure a successful install. This may require changes to the initial presentation based on our technical findings. There is no charge for the network assessment.

Any cable and wiring required is **not included** in the Hosted VOIP quote but can be provided for by Benecom on a T&M or quoted basis.

There will be a onetime cost for installation that includes any hardware required (ie. Router), onsite installation, patch cables, porting of phone numbers, training for your staff with a phone technician being onsite during the first day going live to help facilitate a smooth transition by answering any questions and addressing any problems that may arise.

During the term of the agreement, remote support is included in the monthly price. However, should a Benecom phone technician go onsite for adds, moves or changes or other types of support that can't be handled remotely, the call is billable at the prevailing T&M rates.

The warranty for telephones included in this agreement is for one year. After the one year, replacement of phones will be billable. All new phones have a new one-year warranty.
