RE: Administration Building Mechanical, Air Conditioning System, Emergency Generator
5825 Florida Blvd, Baton Rouge, Louisiana 70806

Dear Mr. Rudesill,

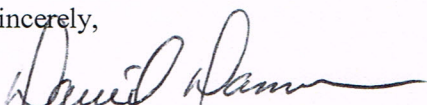

Dammon Engineering, Inc. is pleased to propose our Engineering services for the design of the emergency generator installation to support the Mechanical Air Conditioning systems in the Administration Building at subject address.

We propose to accomplish the design based on the findings of the Administration Building Wiring Inspection. Initially the proposed construction cost is estimated at \$1,000,000.00 however this cost will be adjusted after the inspection above. Our fee shall be based on a percentage of construction cost by the Louisiana A&E Fee calculator which is adjusted with the Building Cost Index and the Consumer Price Index. Currently our fee is estimated @ 10.57% of construction cost, \$105,734.

Dammon Engineering carries \$1,000,000 Professional/General Liability Insurance, and Workmen's Compensation Insurance.

If you accept this proposal, we suggest that we provide you with a standard AIA contract between Architect/Engineer and Owner.

Sincerely,

David Dammon, VP
