RE: Stone Road Structural Design for a 2 Story Office Addition, PO 96782

Mr. Latournerie,

Thank you for the opportunity to propose our services for the referenced project. Dammon Engineering is pleased to provide you with our proposal to furnish the additional structural engineering services to design the metal building at the above-proposed project on Stone Road, which will consist of the addition of approximately 6,500 square feet for office space. This structural design is to allow for a single story building to accommodate a 2<sup>nd</sup> floor conversion at some later date.

Our structural design package will include Five sets of structural steel shop drawings, with all required connections ready for bidding, provided to you following 100% design completion.

We propose a fee of approximately \$7,800.00 (Seven Thousand Eight Hundred Dollars) to design the structural steel building. This fee does not include any city, parish or state reviews or any government agencies. Please amend the current PO 96782, to include this additional fee.

Dammon Engineering, Inc. will be available during the construction phase to answer questions and clarify information contained in our plans.

If you have any questions, or require additional information, please feel free to call.

Sincerely,

David Dammon, VP  
Dammon Engineering, Inc.
