**RE: Topographic Survey-Former PSL North American Site
Sea Plane Road
Pearlington, Hancock County, MS**

Dear David:

Thank you for your interest in Clearpoint Consulting Engineers, P.A. as survey consultants for the above-referenced project.

This topographic survey will include the areas outlined in the drawings provided by your office. We will take elevations shots as required to determine drainage patterns within the subject area and show elevations with 1' contours, and spot elevations where needed. Also, we will shoot existing finish floors of adjacent buildings and locate critical items that will be needed for design, i.e. sidewalks, handicap parking, back of curbs, drainage inlets and piping, entrance ramps, etc. Also included will be underground utilities as determined by MS One Call and or drawings provided by site personnel. We will also set Benchmarks and control points that may be used during construction.

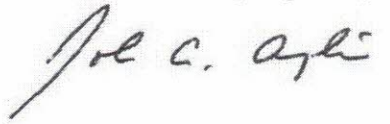

If not in a controlled airspace, we will fly the site with an UAS. We will provide a high quality ortho-rectified image of the area that will be beneficial during design and can be underlain the topographic survey

Fees for Professional Services:

Topographic Survey:	\$7,500
UAS ortho-rectified image	\$1,500

We appreciate the opportunity to be of service and look forward to working with you on this project. Should you have any questions please feel free call.

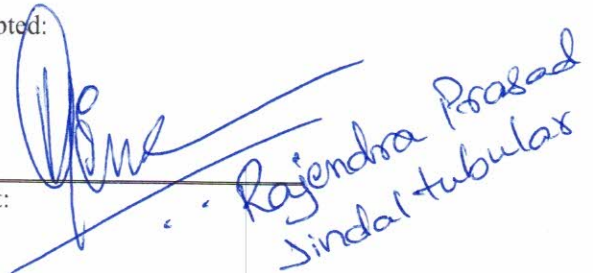

Clearpoint Consulting Engineers, P.A.

John C. Anglin, P.S.
