

DIAMOND BRITE
EXPOSED AGGREGATE FINISHES

There's more to a great pool finish than meets the eye. A truly outstanding pool finish is durable, comfortable, easily maintained, and it enhances your poolscape environment while complementing your home.

Diamond Brite®, Diamond Quartz, and the new Diamond Brite® Watercolors lines from SGM, Inc. are all of that and much more. Diamond Brite combines natural quartz aggregate with polymer-modified cement, while the non-fading sparkle of Diamond Quartz is available a stunning variety of colors. Our latest pool, spa, and water feature finish, Diamond Brite Watercolors, blends unique tones and hues for a custom design aesthetic. The result of using one of our exposed aggregate finishes is a unique surface that stands up to the harshest pool environments while providing years of beauty and enjoyment.
